Currently studying Full Stack development at Henry's bootcamp and a Associate degree in computer science at UDELAR. Actively looking for my first development experience in IT, where I want to be able to keep learning and contribute with my actual knowledge. Despite I consider myself a Full Stack developer, I must say that I have preference towards Back End development, therefore i would like to specialize myself in that area.

EDUCATION

Full Stack Development
Henry
01/2022 - Present   *Montevideo, Uruguay*

Associate Degree in Computer Science
UDELAR- UTEC
03/2022 - Present   *Montevideo, Uruguay*

Bachelor Degree in Computer Science
UDELAR
03/2021 - Present   *Montevideo, Uruguay*

Web Development
Jóvenes a Programar - CUTI
03/2021 - 12/2021   *Montevideo, Uruguay*

EXPERIENCE

Teaching Assistant
Henry
03/2022 - Present   *Montevideo, Uruguay*
Achievements/Tasks
- Coordinate a group of students to achieve integration to the study group.
- Guide students in the first steps of the course.
- Assist to solve exercises and promote group collaboration (Pair Programming).
- Propose ideas to improve the Bootcamp processes.

SKILL HIGHLIGHTS

Javascript · Typescript · React · Node · Redux · Html · Css · PostgreSQL · MongoDB · C · Express.js · Bootstrap

PROJECTS

Full Stack - Pokemon APP (03/2022 - 03/2022)
- Full Stack app that consists in a CRUD SPA using React, Redux, Node, Express, PostgreSQL and Sequelize. In this project, i had to develop both Front End and Back End, as well as the database. The app allows you to filter, sort, search, create, update, delete and read pokemon, using the PokeApi V2 api to extract the information.

Front End- Weather APP (02/2022 - 02/2022)
- A React SPA that allows you to search the actual weather of all the cities that are available on the OpenWeather api.

Front End- Pomodoro APP (02/2022 - 02/2022)
- A simple pomodoro timer made using React.

Front End - Contablito V2 (10/2021 - 11/2021)
- My first Front End app made using vanilla Javascript and Bootstrap. Consists in a false CRUD app, using LocalStorage as a database. It's functionalities are the same as the Pokemon APP: filter,sort,create,update,delete and read products.

CERTIFICATES

The Complete SQL Bootcamp 2022: Go from Zero to Hero - Udemy (03/2022 - 03/2022)

The Complete Node.js Developer Course (3rd Edition) - Udemy (03/2022 - 03/2022)

JavaScript Algorithms and Data Structures - Freecodecamp (09/2021 - 10/2021)

Responsive Web Design - Freecodecamp (08/2021 - 09/2021)

First Certificate (B2) - University of Michigan (Alianza Uruguay) (03/2019 - 12/2019)
